Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

NAMES AND LABELS

- ▲ Select elements do not have associated label elements.

- ▲ Links do not have a discernible name

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

NAVIGATION

- ▲ Heading elements are not in a sequentially-descending order

These are opportunities to improve keyboard navigation in your application.

BEST PRACTICES

- Uses ARIA roles only on compatible elements

- Identical links have the same purpose.

These items highlight common accessibility best practices.

ADDITIONAL ITEMS TO MANUALLY CHECK (10)
